EXPERIENCE

Frontend Engineer Intern **Jakarta, ID**
PT Shopee International Indonesia Oct 2023 - Feb 2024
• Trained in Go, TypeScript, React, Next.js, Redux, Jest and other relevant technologies through a structured curriculum, following industry best practices and clean code
• Completed 10+ projects of varying complexity and scope as exercises and graded assignments, receiving positive feedback from mentors
• Collaborated within a cross-functional team of six engineers to deliver a digital healthcare web application, spearheading the development of a WebSocket-based chat platform for the telemedicine feature

Cloud Computing Trainee **Remote**
Bangkit Academy Feb 2022 - Jul 2022
• Developed both soft and technical skills in basic web development and cloud solutions, dedicating 6 hours daily in workshops, self-paced courses, guest speaker sessions, and consultations
• Collaborated with five other students to develop and deploy a mobile app for our capstone project, managing project planning and deployment configurations on Google Cloud Platform

EDUCATION

Universitas Dian Nuswantoro **Semarang, ID**
Bachelor of Informatics Engineering Graduated in Aug 2023
• Relevant coursework: Data Structures, Algorithms, OOP, Computer Network, Database, Web Programming

SELECTED PROJECTS

Crumpled Paper Dec 2023
A Medium-like news publishing platform with content management system, subscription-based content access and trending articles based on user likes
• Tech stack: Next.js, Zustand, Tailwind CSS

Puri Feb 2023 - Jun 2023
Developed for a logistics company in Semarang, this application aims to improve the customer order processing workflow. It provides an alternative to the existing manual whiteboard method with an integrated web-based system, facilitating a seamless coordination between the sales and logistics divisions. This transition seeks to reduce human errors and increase delivery response time, enabled by real-time data display and push notifications
• Tech stack: React, Chakra UI, Firebase, PWA

Portfolio Feb 2023 - Jun 2023
My own personal platform to share my learnings through blog posts
• Tech stack: Next.js, Tailwind CSS, MDX, Cloudinary, Redis

See more details on tifan.me/projects
